ConnectaRail

A stylish blend of timber and stainless steel makes for an eye catching **continuous handrail system**

Available in **40mm and 50mm** diameters with a unique fixing system for ease of installation

ConnectaRail

The **Intrim Connecta Rail** is used for a large variety of projects including aged care, hospitals, hotels and apartments as it is aesthetically and ergonomically appealing and easy to install.

Connecta Rail 40

Tas Oak

40mm diameter Rail (Random Lengths)

DOW40T

Stainless Steel Bend / Return

90° bend with 60mm internal radius (Also for 90° return to wall)

SS4090B

Stainless Steel Bend

45° bend with 116mm internal radius

SS4045B

Stainless Steel End Cap

40mm diameter

SS40EC

Stainless Steel Joiner

40mm diameter

SS40J

Joining Fastener

Allow 2 for each bend / joiner and 1 for end cap

JF01

Stainless Steel Handrail Bracket

with Concealed Fixing

HB02S

Drilling Jig

SSDJK40

Premium Construction Adhesive

To be used for SS4090B return to wall

CA01SS

Connecta Rail 50

Tas Oak

50mm diameter Rail (Random Lengths)

DOW50T

Stainless Steel Bend / Return

90° bend with 55mm internal radius (Also for 90° return to wall)

SS5090B

Stainless Steel Bend

45° bend with 111mm internal radius

SS5045B

Stainless Steel End Cap

50mm diameter

SS50EC

Stainless Steel Joiner

50mm diameter

SS50J

Joining Fastener

Allow 2 for each bend / joiner and 1 for end cap

JF01

Stainless Steel Handrail Bracket

with Concealed Fixing

HB02S

Drilling Jig

SSDJK50

Premium Construction Adhesive

To be used for SS5090B return to wall

ConnectaRail FAQ's

1. Is the Connecta Rail suitable for 9C compliant aged care facilities?

Yes. The Connecta Rail is perfect for use in aged care and health projects, and complies with Australian Standard AS1428.1-2001.

2. Is the Connecta Rail available in any other species of timber or only Tas Oak?

We can manufacture the Connecta Rail in a number of different species including Jarrah, Blackbutt, Spotted Gum, Maple, Pine, with other species available on request. Tas Oak is a stock item.

3. Is the Connecta Rail system finished with a coating?

No. The Connecta Rail is ready for a clear or specified coating of your choice once installed.

4. Do I need to use an Intrim Tas Oak Chair Rail to fix the handrail brackets or is fixing to plasterboard sufficient?

Fixing to plasterboard is sufficient but we do recommend the use of an Intrim Chair Rail for added support. Noggins will have to be placed in the wall at correct height for bracket fixing prior to plasterboard.

Please speak with our sales team for any further questions you may have.
