Natural Range

When installed natural, Weathertex Natural surface has the characteristics of raw undressed timber. Surface can be oiled to maintain the look of fresh brown timber; alternatively it can be left untreated and allowed to age naturally.

The surface will weather and grey subject to location and sun exposure. Weathertex natural finished products are covered by a 7 year warranty not to rot, split or crack.

When first installed, the Natural product has a dark brown appearance. 6 to 12 months later, the colour slightly changes to a medium blend. After 2 years, the colour has significantly lightened and will gradually silver.

*The Natural aging process can differ vastly depending on directional aspects and house design. A house with eaves will see the Natural product grey in different stages.
